

RYO MAGOSHI

Kyoto, Japan

E-mail [r.magoshi.ma54 \[at\] gmail.com](mailto:r.magoshi.ma54@gmail.com)

[GitHub](#) [Google Scholar](#)

RESEARCH INTERESTS

- Speech: Speech Recognition, Speech Synthesis, Speech Translation
- Dialogue: Cascaded or Full-duplex Dialogue Systems
- Deep Learning: Self-Supervised Learning

EDUCATION

M.S. in Computer Science, Kyoto University, Kyoto, Japan 04/2025 – 03/2027

Department of Informatics, Graduate School of Kyoto University

- Thesis title: *TBD*
- Supervisor: Tatsuya Kawahara

B.E. in Engineering, Kyoto University, Kyoto, Japan 04/2021 – 03/2025

- Supervisor: Tatsuya Kawahara

WORK EXPERIENCES

LY Corporation 08/2025 – 10/2025

Research Internship

- Text-only Domain Adaptation of LLM-based ASR
- Published as [C3]

PUBLICATIONS

Conference Papers

- [C1] **Ryo Magoshi**, Shinsuke Sakai, Tatsuya Kawahara. “Phoneme-Guided Initialization for LLM-based Speech Recognition.” *Proc. IEEE Spoken Language Technology Workshop (SLT)*, 2026. **(To appear)**
- [C2] **Ryo Magoshi**, Jaeyoung Lee, Shinsuke Sakai, Tatsuya Kawahara. “Improving Zero-Shot Phonetic Classification through Language-Agnostic Articulatory Features.” *Proc. INTERSPEECH*, 2026. **(To appear; nominated for Best Student Paper Award)**
<https://arxiv.org/abs/2607.23606>
- [C3] **Ryo Magoshi**, Takashi Maekaku, Yusuke Shinohara. “Refining Pseudo-Audio Prompts with Speech-Text Alignment for Text-Only Domain Adaptation in LLM-Based ASR.” *Proc. INTERSPEECH*, 2026. **(To appear)**
<https://arxiv.org/abs/2605.14340>
- [C4] Jaeyoung Lee, Masato Mimura, **Ryo Magoshi**, Tatsuya Kawahara. “LLM-as-Joiner: Decoupling Alignment from Language Modeling in Label-synchronous ASR.” *Proc. INTERSPEECH*, 2026. **(To appear)**
- [C5] Masato Mimura, Jaeyoung Lee, **Ryo Magoshi**, Tatsuya Kawahara. “Mixtures of Lightweight Articulatory Experts for Multilingual ASR.” *Proc. IEEE International Conference on Acoustics, Speech and Signal Processing (ICASSP)*, 2026.

- [C6] **Ryo Magoshi**, Shinsuke Sakai, Jaeyoung Lee, Tatsuya Kawahara. “Multi-lingual and Zero-Shot Speech Recognition by Incorporating Classification of Language-Independent Articulatory Features.” *Proc. INTERSPEECH*, 2025.

TECHNICAL STRENGTHS

- Languages: Python, C++, TypeScript
- Frameworks: PyTorch, ESPnet, NeMo, FairSeq, Django, React

AWARDS

- Best Student Paper Award Nominee** (one of 14 nominees), from INTERSPEECH 2026, Sydney, Australia, nominated August 2026
- Paper title: “Improving Zero-Shot Phonetic Classification through Language-Agnostic Articulatory Features”
 - interspeech2026.org/en-AU/pages/program/best-student-papers
